EXEMPTIONS FROM THE CHEMICAL INVENTORY WORKSHEET

The chemical inventory worksheet is composed of three parts: A, B, and C. Instructions are on this Inventory Worksheet. For most chemicals, all three sections must be completed by the subcontractor during the terms of the contract. However, there are certain types of chemicals that, if used by the Contractor in the performance of work, will exempt the Contractor from the requirements to complete all of part of the worksheet. These types of chemicals are listed as follows.

Part A, B and C Exemptions

| | | | | |
|---|--|-------------------------------|---|----------------------------------|
| <p>ARTICLES Items formed to a specific shape or design, have end-use functions dependent on the design, and that do not release or cause exposure to a hazardous chemical under normal conditions of handling and use.</p> | <p>MOTOR VEHICLES Chemicals that are used in cars, trucks, heavy equipment, forklifts, fuel tanks (gas diesel, propane), and other vehicle fluids provide the following information: Column A: Product Name/Manufacturer; Hanford SDS/MSDS No., Container Description (Size), Primary Storage Location</p> <p>NOTE: Reporting is not required for chemicals already in use for operation of the vehicle.</p> | <p>OFFICE SUPPLIES</p> | <p>PERSONAL ITEMS Items used solely to maintain employee comfort, whether brought into the workplace by employees or provided by the employer.</p> | <p>FIRE EXTINGUISHERS</p> |
|---|--|-------------------------------|---|----------------------------------|

Part B and C Potential Exemptions

The exemption from parts B and C will be at the discretion of the BTR during the pre-job meeting.

CHEMICALS INTENDED FOR IMMEDIATE USE - Chemicals taken into an area for a specific job or task that will be consumed by the end of the normal work shift and containers that will be returned to the primary storage location at the end of the working shift.
