Change Summary

Description of Change

Editorial change consists of updating company terminology (CHPRC to CPCCo) and referenced documents (PRC to CPCC), as well as an update to the current procedure templates, including spell check and updated table of contents

Publication correction 09/01/21 - Include incorporated change request into task file

CPCCo Safety, Health, Security, Quality, and Environmental Policy**Published Date: 04/13/21****PRC-POL-SH-5053****Effective Date: 04/13/21**

This Level 1 Policy applies to Central Plateau Cleanup Company (CPCCo) and CPCCo subcontractors performing CPCCo work scope.

Central Plateau Cleanup Company's philosophy is; *"If we can't do it safely, we won't do it"*. Protection of people and the environment, while delivering quality products and services is a CPCCo core value. It is our vision to create a unified *"One Culture. One Team."* relationship that empowers managers, employees, and contractors to drive this philosophy and core value into all operations and achieve excellence in safety, health, security, quality, and environmental performance. This is accomplished through the use of the Integrated Safety Management System (ISMS), Environment Management System (EMS), Human Performance Improvement initiative, and by implementing the basic tenets of the Voluntary Protection Program (VPP).

Central Plateau Cleanup Company fulfills the mission and expectations of our clients, employees, and communities based on the following:

- We require all managers and supervisors to provide the leadership and resources to empower employees to take responsibility for their actions and for the actions of their fellow employees to create a safe, healthy, secure, and environmentally-responsible workplace.
- We recognize that our employees play a vital role in creating and maintaining an environment where involvement, teamwork and continuous improvement flourish. We will encourage active and meaningful employee involvement at all levels.
- We maintain an atmosphere of mutual respect, trust, and open communication where employees feel free to raise issues without fear of reprisal and resolve issues within a reasonable time frame.
- We provide value to our Department of Energy client by: tailoring processes to contracted needs, requiring all Central Plateau Cleanup Company personnel and subcontractors to meet expectations, be responsive, and always be in compliance with requirements and company standards to achieve safety, health, security, quality, and excellence in environmental protection.
- We systematically evaluate our facilities and physical work environment to verify that safe and secure work conditions and practices are established and consistently followed, and non-compliances are corrected quickly.
- We continually assess and improve our safety, health, security, quality, and environmental protection programs to strive for Target Zero performance: no injuries, illnesses, incidents, environmental impacts or errors/omissions.
- We care about the safety and security of every Central Plateau Cleanup Company employee and hold all employees accountable for the protection of people and the environment, understanding their work assignments, actively participating in identifying and evaluating hazards, taking responsibility, "walking the talk" on and off the job, and immediately reporting injuries, illnesses or concerns.
