

Bob Wilkinson

President & Project Manager

Bob has more than 30 years of experience, with much of it an executive leadership role leading complex integrated teams executing at a high level to enable the DOE cleanup mission.

Formerly the president of Hanford Mission Integration Solutions, Bob has a wealth of experience working as a site integrator and providing site services and resources to Hanford contractors focused on enabling and maximizing efficiencies. Prior to HMIS, Bob served as president for their predecessor Mission Support Alliance. He also served as vice president of environment, safety, health and quality at Washington River Protection Solutions (WRPS), where he was responsible for environmental protection, safety and health, security and emergency services, radiological controls, quality assurance, contractor assurance and vapor recovery support. While at WRPS, he also acted as chief operating officer and vice president of base operations. Bob's professional background includes managing nuclear and high-risk industrial facilities, demolition of facilities, remediation of waste sites, and surveillance and maintenance of 530 waste sites, nine nuclear facilities and 150 radiological/industrial facilities at Hanford.

Bob's tenure at Hanford has afforded him the opportunity to work in all aspects of operations: tanks farms, nuclear facility management with emphasis on waste packaging and treatment, project management, environmental compliance, construction management, engineering, quality assurance, emergency response, and radiological control - and all phases of project execution, ranging from early startup to commissioning.

Bob graduated from Montana State University with a bachelor's degree in electrical engineering and earned a master's degree in business administration from Eastern Oregon University.

Bob is corporately aligned to parent company Amentum as a Senior Vice President.

Brad Page

General Counsel

The CPCCo legal department provides legal advice and counsel to support day-to-day functions, serves as a primary point of contact with all outside counsel, manages all administrative proceedings and litigation, and provides legal counsel and support to CPCCo governance boards and committees.

Its responsibilities also include hiring of outside legal counsel, legal support on procurement and subcontract matters; environmental and regulatory matters, including compliance with the Price Anderson Amendments Act; employment and labor relations; tax issues, insurance, intellectual property; and all other legal matters.

Prior to joining CPCCo, Brad was the Deputy General Counsel at tank operations contractor Washington River Protection Solutions, focusing on government contracts and procurement, as well as labor and employment law.

Rob Roxburgh

Communications & External Affairs Director

Rob has more than 20 years of experience in Communications in both the television broadcast and media relations fields. Prior to joining CPCCo, Rob spent 12 years at tank operations contractor Washington River Protection Solutions (WRPS), where he led communications efforts in several areas, including tank waste retrievals, engineering services and the development of chemical vapors protection plans. In 2019, Rob assumed the role of Communications Director, managing a staff responsible for editorial, video and graphics content in support of all tank farms organizations. Rob was also the main point of contact for the Department of Energy client, WRPS management and the Amentum corporate office.

Rob leads the Communications External Affairs team at CPCCo that serves as the primary contact for media, community organizations, stakeholders and the general public. He is responsible for developing news releases, responding to media queries and producing a wide range of other communications products. Employee communications efforts are accomplished through employee meetings, presentations, messages, newsletters, management meetings, internal/external websites and social media.

Rob is active in the community, serving on several boards, including Visit Tri-Cities, the Tri-City Regional Chamber of Commerce and Columbia Ability Alliance.

Stacie Anderson

Chief Compliance Officer & Internal Audit Director

Stacie has 33 years of Hanford experience. Prior to CPCCo, she served as Prime Invoice and Business Process Compliance Manager at Hanford Mission Integration Solutions (HMIS) and as the Technical Accounting Manager with both HMIS and CHPRC. Before that, she worked as a senior auditor at Washington River Protection Solutions and in various finance and compliance roles dating back to Westinghouse. Most recently, Stacie has been serving as CPCCo's Chief Compliance Officer and Ethics Program Manager, two roles she maintains in addition to this assignment.

The CPCCo Ethics & Compliance (E&C) and Internal Audit (IA) are independent, objective assurance and consulting organizations that bring a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control and governance. The IA organization performs and coordinates audits and inquiries of non-technical information and may support outside agencies with scheduling entrance and exit conferences. The E&C organization champions ethical practice and compliance standards through various training and awareness activities.

Bill Barrett

Chief Operations Officer

Bill has 30 years of industry experience, including 13 years of his professional career advancing the Hanford Site's groundwater objectives.

In his role as COO, Bill seeks to enhance cross-departmental integration and oversight of all field work operations. He provides key leadership in the safe and consistent execution of work activities, while acting as the lead interface with DOE federal project directors and operational oversight leadership.

Bill oversees critical project readiness activities to ensure a consistent approach, including IDF startup to support the Direct Feed Low-Activity Waste program, Canister Storage Building multicanister overpack welding, capsule transfer from the WESF pools to dry storage, and the restart of TRU shipments to the Waste Isolation Pilot Plant.

Marty Ellis

D4 End States Director

Marty brings more than 40 years of experience to the table, having started his career at Hanford's K Basin in 1983. He is an experienced nuclear facility project, operations, maintenance, and engineering manager – including HazCat 2 and 3 nuclear facilities. In addition to Hanford, Marty has worked in various leadership positions at Oak Ridge, Savannah River and Rocky Flats.

Marty's team is responsible for driving CPCCo End State completion in Hanford's 100, 200 and 300 Areas – encompassing the breadth of the Central Plateau and the Columbia River Corridor. Key cleanup activities in the Central Plateau include safe and compliant base operations for Hanford chemical separations plants and facilities awaiting final disposition, aging facility mitigation and cost-effective interim response actions for at-risk structures and facilities, and surveillance and maintenance of all 200 and 400 Area buildings and waste sties. Along the River Corridor, work activities include ensuring safe and compliant base operations for the Hanford 105KW Facility, 100K ancillary facilities and 324 Building, preparing K West reactor for interim safe storage, and completing soil remediation in K Area.

Jennifer Nuzum

Maintenance & Work Control Director

Jennifer has more than 30 years of experience in all phases of DOE work, including operations, projects, maintenance and environmental. She joins us most recently from the Pacific Northwest National Laboratory (PNNL), where she led operations for a \$860M, 1600-person research directorate. She also held assignments in Contractor Assurance, Independent Oversight, Quality, and Requirements Management.

Prior to PNNL, Jennifer managed major activities and projects on the Hanford Site, including spent nuclear fuel and sludge removal at K Basins, and held facility and operations management positions at the Waste Sampling and Characterization Facility and 222-S Analytical Laboratories. Jennifer also supported Fluor projects outside the Hanford Site, including support to FEMA in the aftermath of Hurricane Katrina and construction of a \$600M polysilicon production plant in Moses Lake, WA.

As M&WC Director, Jennifer helps assure equipment and facilities are in optimal condition, and that work is planned, scheduled and executed safely, compliantly and efficiently.

Jennifer has a Bachelor of Science in Chemistry degree from Whitworth University and is a Certified Project Management Professional.

Ryan Stoner

Groundwater Remediation & Regulatory Strategy Director

Ryan Stoner is CPCCo's Groundwater Remediation & Regulatory Strategy Director. With more than 20 years of experience, he leads an organization responsible for all soil and groundwater operational activities to support Hanford Site cleanup and closure. This includes providing safe and compliant base operations for site pump-and-treat facilities, efficiently operating groundwater monitoring, and managing well installations and borehole characterization projects.

Before his role as Director, Ryan served as CPCCo's Deputy Director of Soil & Groundwater Operations for more than two and a half years. Prior to that, he worked at the Hanford tank farms, where he led multiple large projects. He has also managed teams at Hanford's vitrification plant, Canada's Bruce Power and China's Haiyang & Yangjiang nuclear power stations – bringing more than two decades of experience in operations and project management to his position.

To truly demonstrate long-term strategy, the non-hazard category operations of Groundwater Remediation & Regulatory Strategy reports to the President's Office. Ryan's role combines groundwater scope and regulatory strategy under a single director to help integrate and implement a treatment plan for the Hanford Aquifer system.

Michael Koch

Engineering & Nuclear Safety Director

Michael brings more than 34 years of nuclear cleanup experience to the CPCCo team, most recently serving as Chief Engineer for Amentum's North America Nuclear sector (Jacobs before the merger). He has vast experience overseeing work at cleanup sites across the continent, including Paducah, Kentucky; Idaho Falls, Idaho; West Valley, New York; Las Vegas, Nevada; and Pinawa and Chalk River, Canada. Prior to that, he served as the Deputy Vice President of Waste and Fuels Management here at Hanford, with notable time spent at WESF, CSB, CWC, T Plant, PFP and 100K. He also spent more than a dozen years at Hanford's tank farms.

Under Michael's direction, CPCCo's Engineering & Nuclear Safety organization provides engineering, nuclear and transportation safety, fire protection, and operations, maintenance and project support to facilities and projects across the Central Plateau.

His organization is responsible for the establishment and maintenance of key processes, procedures and the rigorous technical standards required to enable and ensure successful execution of the CPCCo cleanup mission.

Megan Casale

Workforce Resources Director

Megan Casale is an experienced Human Resources (HR) professional with more than 15 years managing complex HR operations and developing strategic programs. She excels at collaborating with diverse stakeholders to ensure compliance and quality in workplace investigations.

Before her current role, Megan significantly contributed to Washington River Protection Solutions – Hanford's former tank operations contractor – in various roles including recruiting, compensation and employee relations. She holds a bachelor's degree in Business Management from Seattle Pacific University.

As the Workforce Resources Director for CPCCo, Megan oversees HR and Labor Relations functions, reporting directly to the Office of the President. Her team manages all aspects of employment at CPCCo, including talent acquisition, employee development, compensation programs, field operations and labor relations. Her team also oversees the annual internship and cooperative employment programs.

Mike Pardini

Business Services Director

Mike has more than 20 years of experience in the nuclear cleanup industry. He's held similar roles – including most recently at Hanford Mission Integration Solutions – as the Chief Financial Officer and vice president of business integration. His experience will help lead CPCCo as we continue to streamline business while incorporating large-scale project execution.

The CPCCo Business Services organization manages and administers Business Assurance, Finance, Information Management, Prime Contract Management, Project Integration, Procurement & Supply Chain, and Project Management Office functions.

It implements effective Business services that promptly support execution of mission critical field work – including monitoring contract performance, subcontracting and small business goals, and proactively addressing business operation functions and issues that lead to an efficient and compliant culture.

Darren Boone

Environmental, Safety & Health Director

Darren Boone is CPCCo's ES&H Director. With a robust background in safety, operations, waste management and radiological controls, Darren brings extensive industry experience to the position.

His career includes environmental safety and project management at CH2M HILL, where he played a pivotal role in decommissioning and cleanup projects both at Hanford and the West Valley Demonstration Project. At the Idaho Environmental Coalition, Darren successfully oversaw radiation protection and safety for transuranic waste processing.

Darren holds a master's degree in radiation health physics and a bachelor's degree in human resources management, complemented by certifications in radiation safety. His diverse experience, including service in the U.S. Navy, equips him with a unique perspective and skill set that enhances our leadership team.

At CPCCo, Darren leads an organization dedicated to environmental protection, industrial safety, security and emergency services, radiological controls and industrial hygiene. His leadership is central to fostering worker engagement and ensuring safety throughout the planning and execution of field work, aligning with CPCCo's commitment to excellence in environmental safety and health.

Waynette Roberson

Mission Assurance & Optimization Director

Waynette Roberson is CPCCo's Director of Mission Assurance & Optimization. With more than 30 years of experience in the nuclear and manufacturing sectors, she leads initiatives to align CPCCo's goals with a strong nuclear safety culture.

Previously, Waynette was the Chief Performance Assurance Officer at Canadian Nuclear Laboratories, where she designed the Performance Assurance Organization and developed the Performance Assurance Program. Her career includes roles focusing on performance assurance, quality management and regulatory compliance with several companies across the DOE complex and internationally.

She holds a master's degree in business and organizational communication and a bachelor's degree in environmental engineering technology from Murray State University. Certified as an NQA-1 Lead Auditor, Waynette excels in performance and quality assurance, incident investigation and root-cause analysis.
