## **No One Hurt, Truck Engine Fire on Site**

The One Hanford team ensured a safe and quick response to a vehicle fire in the 200 East Area of the Site this morning, and no one was hurt. The engine compartment of a truck loaded with an empty container from the Site's Environmental Restoration Disposal Facility caught fire near the Effluent Treatment Facility. The driver was not hurt, and the Hanford Fire Department quickly put out the fire. The empty container was not exposed to the fire and is used to haul non-radiological materials, like construction debris.
